

## Pharma Custom Care Services

We understand some Customers have unique needs when it comes to the servicing and maintenance of their equipment. Our service offerings are specifically designed for you to save time, increase efficiency and mitigate risks in your facility.

### Pharma Custom Care PM

Visits and requirements can be adapted to integrate with the Customer's Quality Management System, adjust replacement frequencies based on risk tolerance and equipment usage and align with the maintenance schedules already implemented on site. We also accommodate third-party agreements and equipment modifications.

We collaborate with you to develop and manage tailored maintenance schedules for individual components to ensure each one is maintained at intervals optimized for its specific duty cycle. We efficiently manage these schedules through specialized tracking integrated into our CRM.

### Pressure System Inspection Support

We provide on-site support to accompany third-party inspectors during the inspection of pressure vessels and piping found on STERIS equipment. Streamline the inspection process with professional assistance, maintain high safety standards during equipment handling, and ensure proper equipment reassembly and restart for optimal performance.
